

Solution Center Service

In today's competitive world, executives are forced to look for better strategies to align IT services with their business needs. In turn, IT also has to be a means to change so as to enable business transformation. What is more, it has to be attained within an environment of constant pressure to perform better at a lower cost.

Praxis is devoted to offering information system consulting, development and integration services and has over 13 years of experience in the industry. We have helped numerous organizations to speed-up operation, reduce costs and focus on core business performance improvement through the Solution Center services, which are oriented to outsourcing the IT area development, maintenance and testing.

Praxis motto defines our offer: "IT, Commitment Unlimited".

Commitment to complying with your business needs.

- A Solution Center proven setting-up process to guarantee a fluent and smooth transition.
- Contractual flexibility in terms of operation volume and service scope.
- Broad experience in the industry to offer business solutions and not just software development services.

Commitment to providing high quality.

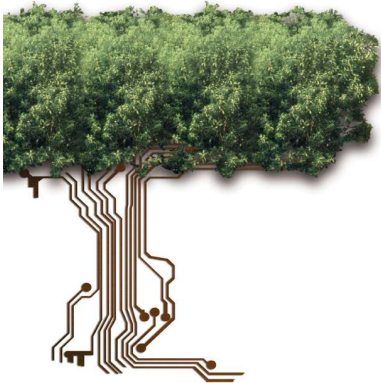

- Always enhancing service execution through a continuous improvement process.
- Highly developed Project Management practices and focused on fulfilling the time, cost and scope needs.

Commitment to providing cutting-edge technology.

- Managing your IT capacities in accordance with existing and new technologies.

Commitment to ensuring security.

- Legal and IP protection, within the NAFTA export agreement.
- Confidentiality agreements to protect your information.

A comprehensive solution that guarantees a reduction in the total cost of operations (TCO).

Please contact any of our business consultants.
Together we can create your success story!
